Love's Web Firm

Cyber Security: Advanced

While your clients can shop for products online with your website, you want to ensure that your transactions, clients, and server are 100% protected and secured. And we provide you with that safety and security to help put your mind to ease!

What All Do You Do?

Naturally, we ensure your site is encrypted with SSL Certification Encryption, and we utilize our own customized Firewall scripts to help prevent hackers from getting into your server! For WordPress Users, we also use 2 more WordPress Plugins to help protect your WordPress Website!

Is Monitoring Included?

We setup our Security Packages to send a designated user an email. This user could be one of our staff members, or it can be directed towards one of your guys. This will help us be proactive with your monitor and get notifications when something happens!

How Many Hackers Have Gained Access?

With our **Cyber Security: Advanced** package, we are proud to inform you not a single hacker was able to get into our servers! And yes. We have hired some hackers to try it out!

Can I Pay Yearly, or only Monthly?

You can pay by the Month or Year! If you want to pay for 6-Months, or 6-Years, you can pre-purchase X-Amount of months you wish!
